Professional Summary

Final-year **Computer Science & Engineering** student with a strong foundation in **Machine Learning**, **Full-stack** web development, and **Data Engineering**. Proficient in **Python, Java**, and the **MERN** stack, with hands-on experience building **RAG-based AI applications**, NLP models, and **REST API-driven** solutions. Certified in **Data Engineering, Data Analysis**, and **AI Foundations**, seeking to apply practical development skills to build reliable, intelligent, and data-centric software solutions.

Education

Kalinga Institute of Industrial Technology July 2023 - May 2027
Bachelor of Technology in Computer Science & Engineering *Bhubaneswar, Odisha*

- **Relevant Coursework:** Data Structures and Algorithms (C), Object Oriented Programming (Java), Database Management System, Computer Network, Design and Analysis of Algorithms, Artificial Intelligence (AI), Machine Learning (ML), AWS, Data Mining & Data Warehousing, Distributed Operating System, Cloud Computing, Deep Learning

St. Aerjay Public School April 2021 - April 2022
Intermediate in Non-Medical with Computer Science *Bulandshahr, Uttar Pradesh*

- **Relevant Coursework:** Introduction to Python Programming, Implementing Basic Data Structures in Python, Database Management System (MySQL), Connecting MySQL to Python

Projects

AI Study & Research Assistant | *Python, LangChain, Streamlit, FAISS, Groq*

- Built a PDF question-answering application using RAG, Hugging Face embeddings, FAISS retrieval, and Groq LLMs for context-aware responses.
- Developed a Streamlit interface with multi-PDF uploads, chat history, and source-page references, supported by PDF extraction and recursive text chunking.

Sentiment Analysis for Movie Reviews | *Python, Scikit-learn, NLTK, Pandas, IMDB Dataset*

- Built a supervised sentiment classification model on 50,000+ IMDB reviews using TF-IDF, NLTK preprocessing, and Logistic Regression/SVM/Naive Bayes.
- Evaluated and tuned models using accuracy, precision, recall, confusion matrix, and ROC curves to improve classification performance.

CampusCare Complaint Management System | *HTML, CSS, PHP, MySQL, REST API*

- Developed a multi-role complaint management system for students, mentors, wardens, IROs, and admins with complaint tracking, resolution, and escalation workflows.
- Implemented PHP REST APIs, JWT authentication, RBAC, and a MySQL database to securely manage complaint lifecycles, remarks, and role-specific actions.

Single Image Super Resolution using CNN & GAN | *Python, PyTorch, OpenCV, Deep Learning*

- Developed and trained CNN/SRGAN-based models to upscale low-resolution images by 4x using adversarial and perceptual loss for improved visual quality.
- Created paired training pipelines using OpenCV and evaluated reconstructed images using PSNR and SSIM against baseline interpolation methods.

Technical Skills

- **Languages**: Python, Java, C, JavaScript, PHP, SQL, HTML, CSS
- **Machine Learning & AI**: PyTorch, Scikit-learn, NLTK, Pandas, NumPy, Matplotlib, Seaborn
- **Generative AI & AI Agents**: Generative AI, Large Language Models (LLMs), AI Agents, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Embeddings, Semantic Search
- **Cloud Computing**: Oracle Cloud Infrastructure (OCI), AWS, Cloud Services, Cloud Infrastructure Management
- **Databases**: PostgreSQL, MongoDB, MySQL, Oracle SQL
- **Tools & Platforms**: Git, GitHub, Kaggle, AutoCAD
